PROFILE

A results-driven backend Developer with a strong foundation in building and optimizing robust web applications and high-performance backend systems. My core competencies include extensive hands-on experience with Django, enabling the rapid development of innovative solutions. I am adept at problem-solving, identifying inefficiencies, and implementing effective technical solutions. Passionate about exploring emerging technologies, I actively experiment with AI/ML applications to enhance functionality and user experience. My commitment to continuous learning ensures I stay ahead of industry trends. I aim to contribute to a forward-thinking team by developing impactful, scalable software that delivers significant real-world value and optimizes operational efficiency.

EXPERIENCE

Devloop Technologies - Django Developer, Rahim Yar Khan – Punjab

Jan 2025 – June 2025

- Spearheaded the backend development of multiple web applications using Python and Django, delivering scalable, secure, and user-friendly platforms that met diverse client needs across various industries.
- Contributed significantly to all phases of the Software Development Life Cycle (SDLC), including requirements gathering, design, development, testing, and deployment.
- Implemented robust RESTful APIs to facilitate seamless front-end and backend communication, optimizing data flow and application performance.

Key Projects and contributions:

- **Transparagent (Real Estate Platform):**
 - Developed a collaborative real estate platform, enhancing agent and assistant workflows to efficiently match users with homes.
 - Integrated advanced analytics dashboards for performance monitoring and secured payment processing via Stripe API, ensuring reliable financial transactions.
 - Designed and implemented a user-friendly interface that improved agent productivity and user engagement.

- **[KylinOracle](#) (Chinese E-commerce):**

- Built a global e-commerce platform for Chinese products, ensuring cross-border accessibility and a seamless shopping experience for international customers.
- Implemented secure PayPal payment integration, reducing transaction friction and expanding market reach.
- Developed efficient order management systems and inventory tracking functionalities to streamline operations and enhance customer satisfaction.

- **[Byzino](#) (Beauty & Skincare E-commerce):**

- Created a modern, visually appealing beauty and skincare e-commerce platform with a focus on conversion optimization.
- Integrated secure Stripe payments and user authentication systems, ensuring data privacy and transactional security.
- Designed a sleek, data-driven interface that provided personalized product recommendations and improved user navigation.

- **[ShopItNow](#) (Home Essentials E-commerce):**

- Engineered a comprehensive e-commerce solution for home essentials and decor, emphasizing intuitive user experience and robust backend performance.
- Developed robust data handling mechanisms for product catalogs and customer information, ensuring data integrity and efficient retrieval.
- Implemented seamless Stripe integration for diverse payment options, streamlining the checkout process and boosting sales efficiency.

- **G6PD (Healthcare Platform):**

- Developed a critical healthcare platform leveraging OCR (Optical Character Recognition) technology to analyze product ingredients for individuals with G6PD deficiency.
- Provided instant, actionable feedback and personalized health tips, significantly empowering users to make informed dietary and product choices.
- Ensured data security and privacy in handling sensitive health-related information, adhering to best practices.

- Completed a comprehensive 6-month internship in Laravel web development, acquiring practical experience in the full software development lifecycle of dynamic, user-driven web applications.
- Gained proficiency in backend development using PHP and the Laravel framework, including database interactions, routing, and API development.
- Contributed to the design, development, and testing of web solutions, focusing on scalability and user experience.

Key Project:

- **CustomiePk (Laravel E-commerce Website):**
 - Engineered a custom Laravel-based e-commerce website that empowered users with dynamic product configuration capabilities before purchase.
 - Implemented complex logic to handle various customization options and price adjustments in real-time.
 - Ensured a seamless shopping experience by optimizing page load times and streamlining the checkout process for enhanced user satisfaction.

EDUCATION

- Bachelor of Computer Science (2021 – 2025)
KFUEIT GPA 3.22
- Matric (2016 – 2018)
Oxbridge School
- FSC (Pre-Medical, 2018 - 2020)
Oxbridge College

SKILLS

- Python
- Django
- DRF
- FastApi
- Github
- MySQL , MongoDB , Postgres
- GraphQL
- Docker
- Postman

Hobbies

- Exploring advancements in Artificial Intelligence
- Experimenting with Large Language Models (LLMs)
